USDA Civil Rights Policy Statement

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at 711. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at [How to File a Program Discrimination Complaint](#) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

Summary: 2024 Under the California Federal Marketing Order

This report presents data on the operations of the California Federal Marketing Order in 2024 through a series of tables and charts. The Bulletin Highlights section summarizes significant events and trends in the California dairy industry during 2024. Additionally, this report includes a list of handlers operating in the marketing area and a map of their respective locations.

Order Volume Increases

Milk receipts from producers pooled on the Order totaled 23.2 billion pounds in 2024, a decrease of 12.1 percent from 2023. The average number of pooled producers declined by 106, decreasing to 846. The average monthly volume per producer exceeded 2.0 million pounds throughout 2024, peaking at nearly 2.42 million pounds in May. The average daily delivery per producer was nearly 75 thousand pounds, a decline of 1.48 percent from 2023.

Class Utilization Shifts

The percentage of pooled milk utilized in Class I averaged 20.4 percent of the pool in 2024, up 2.4 percentage points from 2023. In volume terms, average monthly Class I utilization declined by 1.63 million pounds (0.42 percent) from the previous year, accounting for the additional day in the leap year.

The average volume of producer receipts used in Class II rose by 4.28 million pounds (4 percent). Class II utilization increased to an average of 5.8 percent of the pool in 2024, up 0.9 percentage points from 2023.

Class III and IV utilization trends in 2024 were similar for most of the year compared to 2023. With a lower Class III price, pooling incentives for most of 2024 favored Class III over Class IV, except in September and October when Class IV became the lowest-priced class.

Class III volume averaged about 1.19 billion pounds per month in 2024, a decrease of 189.64 million pounds from 2023, accounting for the leap year. Class III volume reached its highest level under the Order in May 2024, totaling 1.54 billion pounds or 49.69 million pounds per day. It remained above 1 billion pounds in every month of 2024 except September, October, and November. On average, Class III utilization was 59.7 percent of the pool in 2024, down 4.30 percentage points from 2023.

In contrast, Class IV utilization averaged 14.1 percent of the pool in 2024, up 0.9 percentage points from 2023. Class IV volume dropped to its lowest level under the Order in December 2024 at 45 million pounds and averaged approximately 241.14 million pounds for the year. While Class III held the largest share of the pool in most months, Class IV had the highest share in September 2024, accounting for 62 percent of the pool.

2024 Prices

In 2024, Federal Milk Marketing Order prices experienced significant increases across class, component, and commodity prices. Unlike in 2023, almost all price averages increased in 2024.

Commodity Prices – The National Dairy Product Sales Report showed upward movements in average commodity prices from 2023 to 2024. In 2024, the butter price averaged \$2.8870 per pound, while the average cheese price increased by roughly 10 cents per pound from 2023 to \$1.8634. The butter price remained above three dollars for five consecutive months in 2024, more than any other year under FO 51. Similarly, the average dry whey price rose by approximately 13 cents to \$0.4913 per pound. Lastly, the average nonfat dry milk price increased by 6 cents per pound from 2023 to \$1.2420.

Summary: 2024 Under the California Federal Marketing Order (continued)

Component Prices – Component price averages increased in 2024 compared to 2023, except for protein. The average protein price declined by 1 cent from the previous year to \$1.8961 per pound. The average nonfat solids price saw the smallest increase, rising by 6 cents per pound to \$1.0635. Meanwhile, the average other solids price increased by 13 cents per pound to \$0.3010. Lastly, the average butterfat price saw the largest increase, rising by 33 cents in 2024 to \$3.2885 per pound.

Class Prices – All average class prices increased from the previous year. The average Class I price rose by \$1.14 per hundredweight (cwt) from 2023 to \$22.45. The average Class II price increased by \$1.25 per cwt to \$21.34. The Class III price averaged \$18.89 per cwt in 2024, up \$1.87 from 2023. The average Class IV price rose by \$1.63 per cwt from the prior year to \$20.75.

Blend Prices – The average statistical uniform price (SUP) at standard tests for 2024 increased by \$1.53 to \$19.74 per cwt while the weighted average SUP increased by \$1.37 to \$19.65 per cwt. Alternatively, the average producer price differential (PPD) in 2024 declined from 2023. Due to the shift in pooling dynamics in September and October resulting in negative PPDs for those months, the average PPD fell by 34 cents to \$0.85 per cwt and the weighted average PPD declined 24 cents to \$0.91 per cwt.

2024 was a strong year for class prices, with each average outperforming all prior years under Order 51 except for 2022.

Producer Tests

The annual average butterfat test of pooled producer milk increased significantly from the year prior while the protein and other solids tests experienced smaller gains. The annual average producer butterfat test was 4.18 percent, up 0.06 percentage points from 2023. The annual average producer protein test rose by 0.02 percentage points to 3.36 percent. Similarly, the annual average of the other solids test increased by 0.02 percentage points to 5.77 percent.

California Marketing Area Pool Handler Locations, 2024*

Bulletin Highlights – 2024

January and February

The January and February *Bulletins* reviewed the different services provided by Federal Order (FO) 51 the Market Service department. The laboratory team conducts verification payment testing, production control sets, and finished product testing. The field team assists producers with milk weight verification checks and milk tank calibrations.

March

The March *Bulletin* examined trends in California's dairy exports to selected countries, comparing them to the other top five dairy-producing states. Dairy exports significantly contribute to economic growth and influence market prices. This article explored the evolving landscape of dairy exports from the nation's top-producing states. Data were sourced from the USDA's Economic Research Service and the U.S. Census Bureau's USA Trade Online database for the years 2019 to 2023.

April

The April's *Bulletin* reviewed key statistics published in the 2023 Annual Bulletin, including Statistical Uniform Price (SUP) data, cooperative member and non-member producer counts, and route disposition in California.

May

The May *Bulletin* analyzed regional dairy product production shares for 2023. The article examined data from the USDA's Dairy Products Summary Report, which details annual total production of manufactured dairy products in the United States. The data indicated that nearly half of all cheese production occurs in the Central region, while more than half of all butter and nonfat dry milk are produced in the Western region. The report also highlighted a decline in dairy manufacturing plants from 2022 to 2023.

June

The June *Bulletin* provided an overview of milk production trends for the first half of 2024, using data from the USDA's National Agricultural Statistics Service (NASS). From January to June 2024, estimated U.S. milk production decreased by 0.9% (approximately 365 million pounds on an average daily basis) compared to the same period in 2023. Additionally, milk production in NASS's 24 selected states declined by 0.7%, representing a reduction of 159 million pounds.

July

The July *Bulletin* reviewed Federal Order mailbox prices as reported by the USDA Agricultural Marketing Service (AMS) through the Mailbox Price Report. The mailbox price represents the net price received by producers for milk sold, including all payments (such as premiums) and deductions for marketing costs.

August

The National Container Sales Survey is completed every two years for the month of November. This report includes all fluid sales volumes by container types and sizes as well as distribution channels. The August Bulletin compared FO 51's data to the national averages.

Bulletin Highlights – 2024 (*continued*)

September and October

The September and October *Bulletins* reviewed producer price differentials (PPDs) and pooling dynamics, given the unprecedented changes in the Class III and IV prices during those months. In September, the Class III price rose higher than the Class IV price, shifting pooling incentives in favor of Class IV. This shift influenced changes in pooling dynamics for both months, ultimately resulting in negative PPDs. September and October recorded the lowest pool volumes on record for FO 51 due to these price shifts.

November

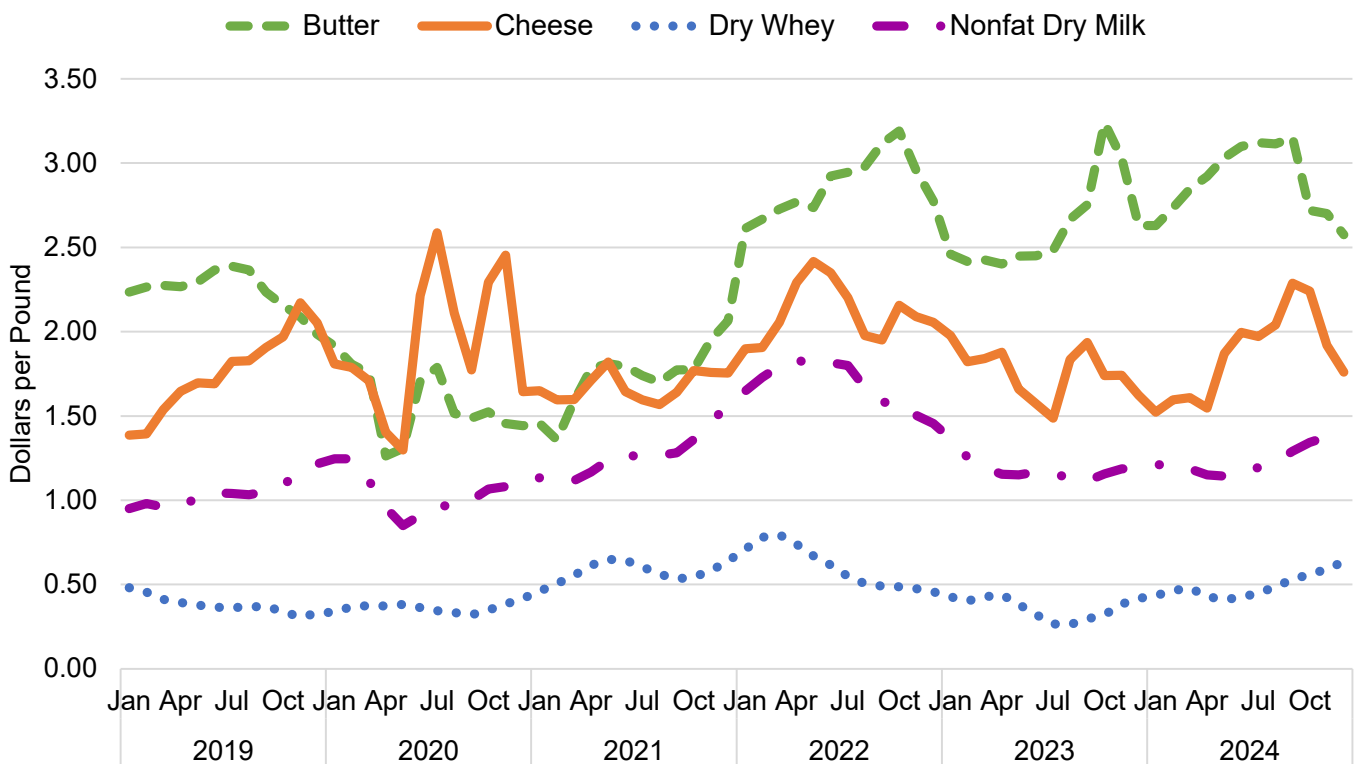

The November *Bulletin* reviewed May 2024 milk marketing statistics by county, as published by FO 32. In that month, 53 of the 1,298 counties marketed half of all FO milk, with each county marketing at least 68 million pounds. Seven California counties accounted for 18.5% of all FO milk marketed in May 2024.

December

The December *Bulletin* summarized notable 2024 pricing and pooling statistics from FO 51. The article reviewed class and component price trends throughout the year, pool utilizations and pooled receipts, supported by visual representations.

National Dairy Product Sales Report Weighted Average Prices, 2019-2024

* Producer receipts based on verified handler reports of pooled producers. Totals may not add due to rounding.

** To maintain confidentiality, counties with fewer than 3 producers have been consolidated into the "other" category and are included in totals. Counties with restricted data are noted with an "R".

*** Represents data from the states of Idaho, New Mexico, Oregon, and Texas.
